

## TEA Approved. TEKS Aligned. Online Access

Edusmart Science is a multimedia science resource that integrates detailed animation and graphics with concise narrated text to enable students to construct their own understanding of essential concepts and terms for **maximum comprehension and retention**.

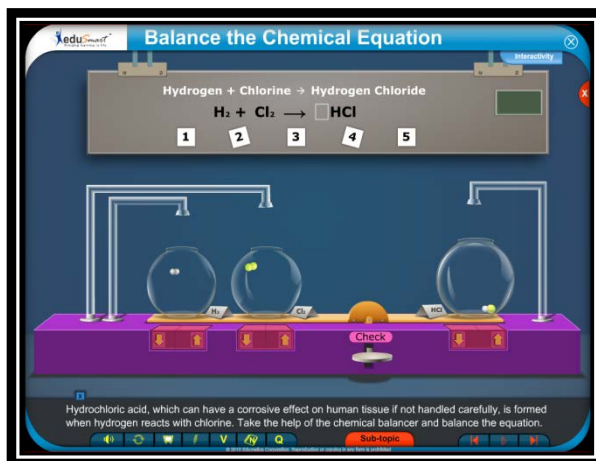

Edusmart Science incorporates **research-based** instructional strategies that are proven effective for all types of learners and are shown to have the greatest probability of increasing student achievement.

Edusmart Science easily **integrates with other types of technology**, such as interactive whiteboards and student response-devices, supporting the use of technology for instruction.

Edusmart Science is **customized and 100% aligned** to the TEKS. It is designed to present science concepts to the depth and rigor required by Texas Standards.

Edusmart's included **interactivities and simulated labs** provide engaging opportunities for students to apply process skills and acquired knowledge to reinforce and assess
