Artec Eva and Space Spider:
The perfect package for mass production, industrial design and more

Artec Eva and Space Spider are the ideal 3D scanners for professional use. Unrivalled in their scanning quality, they are proven to scan fast and in very high resolution, while being easy to use.

Very high resolution
Create a quick, textured and accurate scan of medium to large surface areas with Eva, and use Artec Space Spider to scan small areas, capturing intricate detail with minute precision.

Totally mobile scanning solution
With the available battery pack and tablet compatibility, Artec's handheld scanners are the only totally mobile scanning solution on the market.
Artec Eva and Space Spider are used in countless industries, including quality control, the automotive industry, medicine, heritage preservation, computer graphics, design, forensics, education, reverse engineering and architecture.

A tried and tested product used in a wide range of industries

Artec Eva and Space Spider are used in countless industries, including quality control, the automotive industry, medicine, heritage preservation, computer graphics, design, forensics, education, reverse engineering and architecture.

Artec Studio professional 3D data processing software

Scan with Artec Studio advanced 3D data processing software for editing data fast and effectively using Artec’s unparalleled algorithms. Then export the results into a wide range of formats: OBJ, PLY, WRL, STL, AOP, ASCII, Disney PTX, E57, XYZRGB, CSV, DXF, XML.

Use models in a wide range of software:

- Autodesk
- SolidWorks
- Geomagic
- Blender
With Artec Scanning SDK you can now achieve the very best in scanning results also using your own software, integrating Artec Eva and Space Spider into almost any system.

Either adapt your current software to support Eva and Space Spider, or develop your own software to spec.

Whether you want to scan for medical purposes, industrial quality control, or reverse engineering, Eva and Space Spider can be easily assimilated into your specialized solution.

Artec Scanning SDK can also be used with Artec L2, a 3D scanner with a wider field of view, specifically developed for built-in scanning solutions.

Easy integration:
Integrate Artec Eva or Space Spider into your own scanning system using Artec Scanning SDK
Artec Eva and Space Spider: New possibilities for forward thinking industries

From rapid prototyping to quality control, CGI to heritage preservation, the automotive industry to forensics, medicine and prosthetics to aerospace, Artec Eva and Space Spider are used to customize, innovate and streamline a wide range of different industries.

In focus: Reverse engineering

Test and redesign a part without manufacturing defects using 3D scan data.

Scan your object fast and with high accuracy

Create your 3D model using Artec Studio algorithms

Export to simulation software

Analyze how the object reacts under specific conditions

In focus: Orthopedics

Scan the patient with Artec Eva and use 3D modelling to manufacture an individually tailored, perfectly fitting brace. Each section features its own particular structure, with rigid, flexible or stretchy parts to allow the patient to move and breathe freely, whilst also correctly supporting the body.

Artec Eva and Space Spider are widely used in the entertainment industry, including by TNG Visual Effects, who have provided their 3D scanning services to blockbuster films such as Twilight: Breaking Dawn 1 & 2 and Man of Steel.

In focus: CGI

Digitally capture a person or object to create a 3D CG model for use in visual effects.

Artec Eva and Space Spider are widely used in the entertainment industry, including by TNG Visual Effects, who have provided their 3D scanning services to blockbuster films such as Twilight: Breaking Dawn 1 & 2 and Man of Steel.
In focus: Heritage preservation

Scan and create replicas of cultural objects, preserve them for posterity, digitize collections and make them accessible to everyone all over the world.

Photo: Scanning a 1.8 million year old giant crocodile at a paleontological site in Kenya.

3D scanning has never been so portable

Artec handheld 3D scanners are compatible with both lightweight laptops and tablets, making for the best all round user experience. Plus with the Artec battery pack, which gives up to 6 hours scanning time, you really can take Artec scanners anywhere, capturing objects right in the field.

Artec battery pack

Compatible tablets & lightweight laptops*

Tablets: Microsoft Surface Pro 4, Surface Pro 3, Wacom Mobile Studio Pro 13” & 16” i7 512 GB, Wacom Cintiq Companion 2, Razer Edge Pro
Lightweight laptops: Gigabyte P34G v2, Lenovo ThinkPad T440p, Razer Blade

*These models have been tested and verified by Artec, however other lightweight options may also be available.

Artec Eva and Space Spider: What you need to know

Extremely versatile
Scan a broad range of objects with Artec Eva and Space Spider. Use Eva for medium to large objects and Space Spider for small objects.

Fast and accurate
Eva scans fast, capturing and simultaneously processing up to two million points per second with up to 0.1 mm accuracy.

Speed and precision
Artec Space Spider processes up to one million points per second and produces images of extremely high resolution (up to 0.1 mm) and superior accuracy (up to 0.05 mm).

Target free
No object preparation needed. Start scanning from the word go.

Easy integration
Integrate Artec Eva or Space Spider into your own scanning system using Artec Scanning SDK.

Portability
Lightweight and battery compatible, you can take Artec scanners anywhere. The Artec battery pack provides power for up to 6 hours of scanning.

Safe to use
Artec scanners employ structured light technology and are totally safe for scanning people.

Tablet compatibility
Scan with a tablet for greater mobility.

Real-time scanning
Frames are automatically aligned in real time.

High resolution
Scan in brilliant colour and high resolution (Eva up to 0.5 mm, Space Spider up to 0.1 mm).

3D video mode
Scan a moving object and record a real-time 3D video.

Bundling
Several scanners can be bundled together and synced to scan larger objects automatically.
Artec Studio 12

Revolutionary 3D scanning and data processing software

Enjoy the smartest, easiest and most effortless scanning ever with Artec Studio 12

Easy 3D scanning with Artec Studio 12

Creating 3D scanning masterpieces requires smart and powerful software to capture, process, analyze and edit data.

- User-friendly and intuitive interface for smooth, expertly guided 3D scanning
- Quick and easy start-up process. No special positioning requirements, just point and shoot
- Artec Studio 12 software is compatible with tablets as well as 3D sensors, and together with the battery pack for the 3D scanner, you can easily create professional scans anytime and anywhere

Now anyone can achieve professional results with the most comprehensive and straightforward 3D scanning software on the market today.

- Get high quality scans every time with a smart tracking system that ensures correct movement of the scanner and object capture
- Stop or pause scanning and continue exactly from where you left off, with the smart auto-continue feature
- Achieve equally great results using both manual and Autopilot modes

Smart, fast and automated post-processing

What was once tricky and time consuming for new and inexperienced users is now a thing of the past.

Introducing AUTOPilot – the smartest and most advanced post-processing mode ever. Create professional 3D objects in just a few clicks

Autopilot. An essential tool for beginners, a time saver for experienced users

Answer a few easy questions about the object you have scanned, including its size, geometry and texture. All the questions are illustrated with clear examples.

Based on the info provided, Autopilot automatically chooses the right algorithms and settings to create the best possible result.

Fast and accurate application of automatically selected settings for all the processing stages. Creates a high precision 3D model in no time.

Thorough analysis in Artec Studio

- Get all the needed measurements, including the surface size and the volume of your model
- Compare your scans and models
- Annotate your 3D object

Export files to CAD in one click

- Export scanned model to CAD software with just one click
- Effortlessly export your 3D model directly to SOLIDWORKS in seconds

Export your model to a wide range of popular software:

AUTODESK
SOLIDWORKS
Geomagic
blender
Optional extras:

- Battery pack
- Shoulder bag
- Hard carry case

Where to buy
Artec Scanners
Find Artec Eva and Space Spider in stock at over 110 distribution centers worldwide.
www.artec3d.com/where_to_buy

Global support, training and integration offered by every distribution center and online by Artec’s dedicated support team.

Artec’s fastest structured-light 3D handheld scanner

Eva

Metrological device for superior precision
Long-term repeatability in data capture
Automatic temperature stabilization

Space Spider

Artec Studio 12
Ultimate
For use with Artec 3D scanners and 3rd party sensors*

Artec Studio 12
Professional
For use with all Artec 3D scanners

*Compatible sensors: Kinect for Windows V1 & V2, Intel RealSense F200 (IVCAM), R200 (DS4) & SR300, PrimeSense Carmine, ASUS Xtion, XYZprinting 3D scanner.

**Space Spider**

Warm up period for achieving maximum accuracy

To achieve the very best results, every measurement tool is usually tuned to the conditions of a particular use case. **Space Spider**, however, keeps its precision in a wide range of temperatures and adjusts to the conditions in only 3 minutes, saving you precious time.
