

Technical Data

Complete technical specifications available upon request.

Rope System

#1 Grade Manila Rope, 3/8-in. dia., 100-ft.
Nylon Rope, 3/8-in. dia., 100-ft.
Braided Nylon Twine, .0625 dia.
Thimble (8)

Wall Square Steel Tubing (2)

15-in. of 2-in. x 4-in. x 3/16-in.

D-Shackle, Round Pin (4)

Double Clevis (2)

3/8-16 Eyebolt (5)

1.25-in. long

Wire Rope System

Wedge Socket
Thimble (6)
Malleable Iron Wire Rope Clip (18)
Seizing Rod, 12-in. of 0.5-in. dia. Rod
20-ft. of wire rope
Wire .023 dia. Soft Steel

Metal Mesh Sling

Student Curriculum (M18691)

Instructor's Guide (C18691)

Install Guide (D18691)

Student Reference Guide (H18691)

Additional Requirements:

Rigging 1 Learning System (950-RGB1)
Rigging 2 Learning System (95-RGB2)

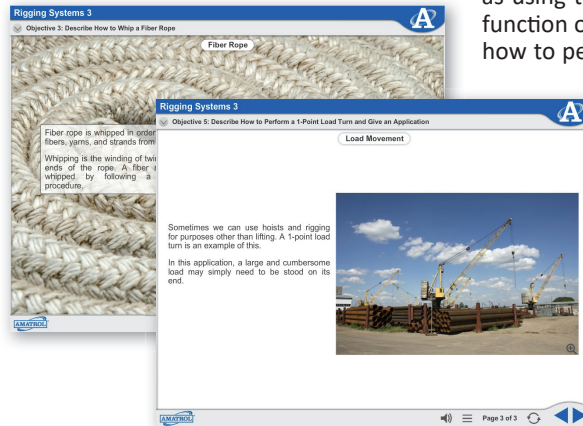

Hands-On Rigging Skill-Building with Wire Mesh Slings and Fiber Rope

The 95-RGB3 allows learners to practice real-world skills with actual rigging equipment in order to build rigging confidence and competency. This learning system includes 100 feet of #1 grade manila rope, 15 inches of wall square steel tubing, a D-shackle and eyebolt, metal mesh sling, wedge socket, and much more! Learners will use these components to develop skills such as calculating the safe working load of a fiber rope sling, using a tag line to control a load, seizing and cutting a wire rope, and tying knots like a double hitch, slip, bowline, and cat's paw.

World-Class Rigging Curriculum

The 95-RGB3 curriculum expands a learner's rigging knowledge to include: fiber rope whipping and splicing, load turning, wire rope termination, and knots. As an example of the strong theoretical content in Amatrol's curriculum, learners will study all aspects of load turning such as using two hoists to lift a load, describing the function of a spreader beam, and understanding how to perform both a 1-point and 2-point load turn.

Amatrol offers this curriculum in a highly interactive multimedia format in lieu of traditional print-based learning activity packets (LAPS). This multimedia features all of the content from the printed curriculum in an exciting multimedia format with videos, 3D animations, voiceovers, and interactive quizzes.

Student Reference Guide

A sample copy of the Rigging 3 Student Reference Guide is also included with the system for your evaluation. Sourced from the system's multimedia curriculum, the Student Reference Guide takes the entire series' technical content contained in the learning objectives and combines them into one perfect-bound book. Student Reference Guides supplement this course by providing a condensed, inexpensive reference tool that learners will find invaluable once they finish their training making it the perfect course takeaway.
